## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13 recites the limitation "the extends" in line 1 of the claim. There is insufficient antecedent basis for this limitation in the claim.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 21 is rejected under 35 U.S.C. 102(e) as being anticipated by Ishikawa et al US Patent 4,816,788.

Ishikawa et al discloses a first conductor WI, a second conductor VB that is substantially perpendicular to the first conductor and a means for contactlessly electromagnetically coupling the first conductor WI and the second conductor VB. (figure 3 and column 4 line 43-47)

Claims 1-12 and 15-20 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not disclose or fairly teach a conductive enclosure wherein the first conductor and the second conductor in a cavity through a first and second opening.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: King US Patent 5,334,941, King et al US Patent 5,307,030, Tamura et al US Patent 6,515,561 and Knochel et al US Patent 6,414,574.
